Comprehensive final

Students will have ALL potential questions and example scenarios sent to them in the module prior to taking the exam. Students will not know which questions or scenarios will actually appear on test day. The test itself will take place via ProctorU in the LAST module. We foresee this test being about 3-4 hours long and a cost for ProctorU ranging between $45-70. This test will be closed book and closed notes. We expect full reference citation as shown in the APA style manual (6th edition).

There will be approximately four (4) short essay and up to two (2) long essay. The content covered will have appeared in course modules you have taken to date. The test will be read and evaluated by two (2) program faculty. In a case where the readers do not agree upon an evaluation, a third reader will evaluate the content and make a determination. The test works on a Pass/Fail basis.
